

## **AUTUMN 2026 PROGRAMME**

**October 2026 to January 2027**

Message from the Chair,

We are pleased to present the CBMW Autumn 2026 Walks Programme. This programme once again features a varied range of walks, ranging from easy to very strenuous. We would like to thank the Leaders for offering and leading these walks. Without the tireless efforts of the CBMW Leaders, we would not have been able to put this programme together.

I would also like to thank to the Working Group Social Events and other volunteers. Together we make the CBMW what it is: An enthusiastic group of people who like hiking in the mountains but who also value the social aspects that come with being part of a community.

Whether you are an experienced or novice mountain walker, you are welcome to join our informal group and enjoy the mountains. The CBMW are making every effort to make their walks a safe and enjoyable event. This is a shared responsibility of Leaders and walkers. We do this by striving to provide information about the walks that is as complete and accurate as possible, enabling walkers to make the correct choice of walk and arrive well-prepared at the start of the walk.

So far, weather-wise, 2026 has been a remarkable year with first a lot of wind rain, and currently very warm summer months. The wind and rain resulted in a higher-than-usual number of walk changes and cancellations. A lot of Stop Press activities... Here too, thanks to the Leaders, who through their flexible approach, ensured that a sufficient number of walks could take place. Let's see what Autumn has in store for us...

Finally, looking ahead, 2027 will also be a special year, but for different reasons: we will be celebrating the 40th anniversary of the CBMW. Of course, we will not let this momentous occasion pass unnoticed. Preparations for a number of special walks and a social event to mark this anniversary have already begun. More on this at the Leaders meeting on 5 November.

I hope to see many of you on our walks and at the social events,

## ROUTE GRADES

**A - Walks marked with A are on iconic mountains**

The mountains in the Costa Blanca region are rugged and the paths are often rough with numerous hazards to cause tripping, loose stones and thick undergrowth. Care is needed at all times. It is very important that walkers assess their ability to complete the walks taking into account the walk gradings below.

### **Walk Levels**

**E - Easy:** A walk of up to 4½ hours on good surfaced tracks and less than 200 metres total ascent.

**M - Moderate:** up to 12km, less than 400 metres total ascent and less than 50% rough going.

**MS - Moderately Strenuous:** Up to 600 metres total ascent and/or no more than 15 km with some rough going taken at a reasonable pace.

**S - Strenuous:** More than 600 metres total ascent and/or more than 15km with steep, loose or heavily vegetated sections.

**VS - Very Strenuous:** More than 800 metres total ascent and/or more than 20km with steep, loose or heavily vegetated sections.

**X - Experienced walkers routes:** Routes which require considerable stamina and/or significant scrambling skills on rough, steep or exposed sections.

**Scr - Scrambling:** This implies the need for handholds to ascend steep rock pitches with a sense of exposure to vertigo and where a slip could lead to a serious accident.

|      |                                                                                                                                                                                |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Scr0 | Very easy scrambling. Short sections requiring the use of handholds on not very steep or sustained sections. No exposure.                                                      |
| Scr1 | Easy scrambling, requiring the use of handholds on not very steep or sustained sections. No exposure.                                                                          |
| Scr2 | Scrambling with some technical moves over steep and more continuous sections. With the probability of some exposure.                                                           |
| Scr3 | Technically difficult scrambling. Sometimes over prolonged sections, possibly very exposed and with steep drops to one or both sides. Not easy to reverse down or escape from. |

### **Terrain**

**A** - All good tracks

**B** - Less than half the route on rough ground

**C** - More than half the route on rough ground or routes with difficult steep awkward/rocky sections.

## INDIVIDUAL RESPONSIBILITIES

We have a short list of **Conventions** – published in the Info section of the website - which act as guidelines and hopefully are an aid to walkers and leaders alike. Everyone is required to read these Conventions as a condition for walking with us and for downloading each season's programme. A summary of the main points of these is shown below.

1. Arrive at the meeting place provided in the programme which may be different to that in the "WalksInSpain" link, in good time. Walks depart promptly at 10:00 unless otherwise noted.
2. Do not leave valuables in your car.
3. Always wear strong-soled shoes or boots suitable for mountain walking.
4. Take a packed lunch and/or other energy snacks and plenty of water, especially in hot weather.
5. Always carry your own first aid kit and a whistle.
6. Carry adequate clothing and always waterproofs as the weather in the mountains can change quickly. Remember that there is always the possibility of having to remain on the mountain during the night in an emergency.
7. Stay in contact with the people ahead of you and behind you particularly at junctions and if too large a gap opens up signal to the leader for a stop so that the gap can be closed.
8. Take all rubbish home with you including orange and banana skins.
9. Do not pick fruit.
10. Walking poles when not in use should be carried with the points facing forwards and down.
11. If a dog is brought along the owner should ensure that the walk is one where dogs are allowed and at all times keep the dog on a lead.
12. In times of bad weather walkers should phone the leader if in doubt about whether the walk will go ahead.
13. If individuals intend to leave the group during a walk they should inform the leader and ensure that their names are removed from the leader's book.
14. Everyone who walks with us is expected to make an annual contribution towards the cost of our websites and display the current year's "fob" on their rucksack. One fob only, please. Ideally, ID should always be carried together with a contact name in case of emergency (ICE).

## INSURANCE

PLEASE BE AWARE THAT WE DO NOT HAVE PUBLIC LIABILITY INSURANCE therefore we STRONGLY recommend that individuals who walk with us take out insurance cover for rescue and medical costs in case of accident on our mountain walks. Those who live here can take out extra insurance via [www.femecv.com](http://www.femecv.com) (in Spanish) or [www.aacuk.org.uk](http://www.aacuk.org.uk) (in English). If you are just visiting the area for a holiday you should check that your travel insurance covers is sufficient - if not then take out extra cover!

## WEATHER

A walk leader may terminate a walk at his/her discretion at any time. During times of persistent bad weather the walk leader will endeavour to ascertain the latest accurate weather conditions predicted in the area of the walk and if the latest information is extreme, or if it has rained (or snowed) excessively during the previous night, the walk leader is not obliged to go to the start of the walk. In times of bad weather please telephone the walk leader if you are in doubt.

## AND FINALLY

Remember to check Stop Press on the website for information on any unavoidable changes to walks and new walks added to the programme. All walks start at 10 am unless otherwise indicated.

Shading denotes a lunch option.

Meeting Point descriptions (*as per the programme Not the WalksInSpain which may differ*) start with town nearest to start followed by Latitude then Longitude (decimalised) of the meeting point (where known). Whilst every effort is made to ensure accuracy the time stated for each walk will always depend on the fitness and ability of the walkers, and the conditions on the day of the walk.

Ensure that you are fully prepared for the walks by choosing the correct level of walk for your ability and the weather conditions and that you take with you the correct amount of fluids and sun protection.

Turn into Los Lagos, then immediately left and park.</p> <p>The walk starts from Los Largos where there is plenty of parking. A gentle ascent for 20 minutes through the wooded area behind Los Largos before reaching the gully. The gully is a steep climb of about 1 hour with sections of loose stones in places. Once at the top the walk continues with a gentle climb on good tracks. The final ascent becomes a little steeper on a very rocky path of the "pointy type" often experienced in this area. So sticks are a help. Spectacular views from the cross towards both Javea and Denia. Cameras a must. The descent initially follows the same rocky path down until it becomes a gentle descent on good paths. The final section is very scree like where again sticks would be a plus. Note this walk is very weather dependent as Montgó often has a "hat" even when the weather is good elsewhere. The walk may need to be modified if this is the case to miss the final ascent to the top.</p> <p>WalksInSpain: <a href="https://tinyurl.com/ybf4hekm">https://tinyurl.com/ybf4hekm</a></p> |

Starting from the Village of Altea La Vieja take the CV755 towards Callosa. Pass the RH turns to Alhama and Paradiso and pass a casa on the RHS with a large statue. Go slow along the straight stretch and take the next rather obscure RH turn, signposted Fort Bernia, (just before Km. 19). (If you miss this take the next RH turn which also leads up). Follow this narrow twisting road steep up some 6 km to its end at the Barbecue car park (BBQ). NOT FOR NERVOUS DRIVERS.</p> <p>This is a popular walk and deservedly so. It is a circuit encompassing the main part of the Sierra but excluding its Eastern end. Starting at an altitude of 650 meters gets you into easy contact with the higher part of the mountain. Yet the walk is quite challenging involving some easy short rock scrambles, short traverses across or slightly up scree, some steep climbs and a 30-meter long semi stoop/ crawl through the "Forat". Views are magnificent especially from the Fort onwards. The ruined Fort is interesting and the "Forat" is a curious feature. This is a tunnel through the "rock spine" of the Sierra some 30 meters long and in part approx a meter high and wide, not claustrophobic as daylight shines through and taken with care, no hazards. Sometimes muddy.</p> <p>WalksInSpain: <a href="http://tinyurl.com/zc5d5I5">http://tinyurl.com/zc5d5I5</a></p> |

Go through Confrides until at approx Km 19.4 and find a track off R. Turn onto this rough track and drive up approx. 0.4Km to reach a junction and park. Alternatively, park at the road and walk up the track to this junction.<br><br>This is a strenuous walk but the effort is rewarded by wonderful scenery and interesting terrain. It starts with a pleasant easy stroll along the south side of the Barranc del Manecillo before dropping down to a short but adventurous walk along the riverbed. The climb up to El Collada starts on a path that zig zags up out of the riverbed to reach a track. Next the route heads W and crosses the top of a ridge with wonderful views of the Barranco del Moro. A steep but worthwhile climb leads to a deep nevera and a short scramble to the summit of Pla de la Casa. A steep descent leads down to a coll and onwards to the pass of Les Bardals. From here a steep descent has to be negotiated on a very rough path before arriving at the track back to the start.<br><br>WalksInSpain: <a href="https://tinyurl.com/y8qyrdaz">https://tinyurl.com/y8qyrdaz</a> |

Some tricky underfoot conditions in the first off-road half. Descent to lunch spot in abandoned campsite. Then, a less taxing ascent after lunch on mostly good track. Main descent along a zig-zagging path with some steps, onto quiet road for about 1km. Next, a well-trodden barranco for about 20 mins, returning us to the cars. This walk has a sharp 200-metre ascent near the beginning which will be taken at a reasonable pace, given that the remainder of the walk is less demanding.<br><br>WalksInSpain: <a href="http://bit.ly/2LjNNEM">http://bit.ly/2LjNNEM</a> |

Cross the bridge and immediately turn R onto surfaced road and park (Walk ends here).759771E 4285706N.<br>Alternatively, drive 200 meters to a bend A. Ample parking.<br><br>A very pleasant walk in fairly level, upland "karst" type scenery, including an old mule path through a barranco, short stretches of track, and long improved goat paths among undulating hills with mountains in the background. A sharp climb to the saddle below Cau from where there is the opportunity of a short climb to its summit. Then continuing along short tracks and a long path down to the CV749 and car(s). The views are excellent and the wildflowers in spring and early summer fascinating. For those making a long day of it a visit to the Iris Garden in the middle of the walk is rewarding in April to June when it is at its best. (Opens April 1st). A possible short cut is described at the end.<br><br>WalksInSpain: <a href="https://tinyurl.com/yazvs5qh">https://tinyurl.com/yazvs5qh</a> |
